ARTISANAL 7 STAGE HAND PRINT NATURAL DYED INDIGO

Natural dyes are dyes or colorants derived from plants, invertebrates or minerals. The majority of natural dyes are vegetables dyes from plant sources and other biological sources such as fungi and lichens. The essential process of dyeing requires soaking the material containing the dye(the dyestuff) in water, adding the textile to be dyed to the resulting solution(the dyebath), and bringing the solution to a simmer for an extended period, often measured in days or even weeks, stirring occasionally until the colour has evenly transferred to the textiles.
