ARTISANAL 7 STAGE HAND PRINT NATURAL DYED

Natural dyes are dyes or colorants derived from plants, invertebrates or minerals. The majority of natural dyes are vegetable dyes from plant sources and other biological sources such as fungi and lichens. The essential process of dyeing requires soaking the material containing the dye(the dyestuff) in water, adding the textile to be dyed to the resulting solution(the dyebath), and bringing the solution to a simmer for an extended period, often measured in days or even weeks, stirring occasionally until the colour has evenly transferred to the textiles.

Natural Gum

Lime Rock

Lythrum Flower

Alizarin

7 stage dyeing – printing process

From natural fabric (100% Cotton;
100% Silk) or blends of regenerated
forest fiber : Cotton Tencel; Modal.
We use natural dyes.

Our process uses sunlight,
decreasing the carbon footprint. All
ingredients being natural helps us
recharge the use water on group.
The solid waste is compostable
(ASTM 6400)

If you are looking at Chemical free
low carbon natural fabrics the 7
stage Indigo print process is a great
option

Design options are unlimited, unmatched to machine print limitations.

Exciting bespoke design options.

LOW MOQ!
