HANDWOVEN IKAT FABRIC

The term “Ikat” refers to dyeing technique used to create the designs on the fabric. It is resist dyeing process ,where bundles of yarn are tightly wrapped together and then dyed as many times as is required to create the desired pattern. This dyeing process is different because the yarns are dyed before being woven into cloth. In most of the other resist-dyeing techniques, like batik for example, it is the final cloth and not the yarn, that’s dyed.
