UNIQUE PRINT WARP IKAT – Again innovation in fabric to offer designers a new way to bring their dreams on fabrics.

Innovation in IKAT

We did take the ikat design, printed on warp and then did the fabric weaving.

Wonderful results to get a cloudy looking hazy fabric with absolutely no two places the same and no figures match to any. But yes something that is natural and unique. Here is one such example. There is no limit on the color / pattern and the options that one can do. A giant canvas for designers to develop bespoke fabrics.

Random variegated and non repeating look is the nature of this technique
