Hand Woven

- 4.4 million people in rural India gets employment in this sector.
- No electricity used – no carbon foot print in weaving.
- Offers unique value with weaving of recycled yarns, wool, cotton, organic cotton, linen, jute, bamboo and many more.
- We have been on Manhattan showrooms with our hand woven in wool, cotton.
- We promote hand woven as it is one of the most noble fabric with low carbon, sustainable and also socially responsible as it helps women and needy with work.

IKAT – the age old tradition
of hand dye and weave

Hand Woven IKAT – from hand dyed yarn

Hand Woven IKAT – from hand dyed yarn

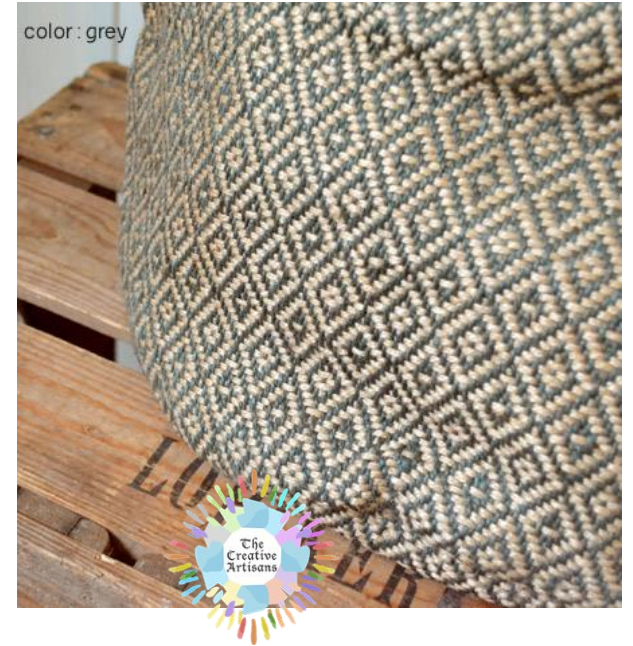

Wool weaving in to multi color panels for accessories and floor covering

We can also do this weaving in cotton, jute, recycled yarn and almost anything in natural fibres

Fine yarn Hand Woven in Silk and Cotton, the art of making motif while weaving

It is impossible for any machine to copy this method. Making it a unique fashion statement. No double its low carbon and helping work for women and needy in rural areas.

Hand Woven Silk – with motif in weaving-

Motif is not an addition but woven as extra thread weaving

Hand Woven
blended with
recycled yarns

Hand Weaving with motif creation at
weaving

Unique Fabrics with Social responsibility and Sustainability
